

Springfield, MO

“Home of the Stainless Tank”

Springfield is widely known for three things... Branson country music shows, Bass Pro Shops World HQ, and **Stainless Steel Tank fabrication.**

At **Watson Metal Masters** we take pride in being located in the heart of tank country. Our location allows us to draw from a highly qualified labor force and other support systems geared around our industry. It all started back in 1956 with a few tanks being built. Now Springfield accounts for well in excess of **\$100 million** worth of custom fabricated tanks and vessels annually.

T-310 S.S. Spray Dryer w/air heater
for APV Anhydro - Dryer Group

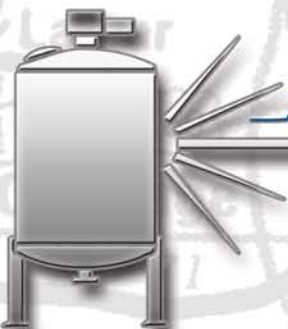

2 x 100 Gallon Multi Compartment
Tank with heat transfer
surface and agitators.

9500 Gallon Single Wall Tank
with internal helical steam coil.

We fabricate premium quality vessels, tanks, hoppers, bins, columns, and structures of stainless steel, nickel alloy and aluminum. We build from the very smallest up to 12' diameter x 40' overall length. Finishes from non-polished to 320 grit pharmaceutical quality with any type of features.
